

Wednesday 20 July 2022

Dear parents and carers,

Firstly, I would like to extend my sympathy to the families in our school community who are experiencing hardship as a result of the severe weather events of the past few weeks. The NSW Government has announced [relief funding](#) for those who have had their homes damaged or have been injured, and I strongly encourage those eligible to apply.

While we continue to face challenges, the wellbeing of our staff and students, and our students' education remains paramount. We will continue to implement our layered COVID-smart measures this term, which are aligned to the NSW Government's general community settings, including:

- staying home and getting tested if unwell, and only attending school when symptom free
- strongly encouraging mask-wearing for all staff and students, particularly in the first 4 weeks of term
- rapid antigen testing for symptomatic students and staff, and close contacts attending school to learn and work
- strongly encouraging COVID-19 vaccinations for students, staff and their families, including a booster shot (when eligible)
- maintaining double vaccination and mask-wearing requirements for staff in working with students at greater risk of serious illness should they contract COVID-19
- strongly encouraging students, staff and their families to get a flu vaccination
- strict requirements for close contacts attending school/schools with support units: including restricting close contacts from attending SSPs and support units
- good hygiene practices
- maximising natural ventilation
- boosted cleaning during the day, with particular attention given to high touch surface areas
- responding to local COVID-19 conditions, when necessary, by working with the department's Health, Safety and Staff Wellbeing team.

Continuing these baseline COVID-smart measures allows us to prioritise student and staff wellbeing while giving our learners a consistent and productive learning environment this term.

## What's new in Term 3?

As winter continues, our COVID-smart measures have been updated in consultation with NSW Health to provide appropriate protection to our school community.

- **Vaccinations.** The department has updated its policy regarding COVID-19 vaccination for employees following an independent risk assessment of school (and corporate) settings and consultation with unions and relevant stakeholders. While vaccination will no longer be a requirement for most department staff from 1 August 2022, staff working in SSPs are still required to be at least double vaccinated against COVID-19 (or hold a valid medical contraindication) to provide additional health protection for our students who may be at

greater risk of severe illness. Beyond our staff, we will continue to strongly encourage our wider school community to keep up to date with their COVID-19 vaccinations as a way of protecting themselves, our students, and our school community more broadly.

- **Boosted day cleaning.** The department has made a slight change to its cleaning process. Cleaning of school sites will now be more concentrated during the day, with an increase in cleaning in school hours, and a subsequent reduction out of hours. Boosted day cleaning will continue to focus on high-touch areas and other hard surfaces, door handles, lockers, light switches and handrails in stairways and movement areas.

### What's continuing for Term 3?

- **Masks.** Masks are an effective way of minimising the transmission of respiratory viruses and infections, and protecting our community, especially those who are at higher risk of severe illness from COVID-19 and flu. We **strongly encourage** all students and staff wear a mask for the first 4 weeks of Term 3, particularly in indoor settings or when distancing is not possible. Masks remain required for staff who work with students at greater risk of serious illness should they contract COVID-19. The latest NSW Health advice also recommends wearing a mask for people who have recovered from COVID-19 and recently completed their 7-day isolation period for an additional 3 days (from days 8 to 10 after receiving a positive COVID-19 result). Additionally, as outlined in the below section on close contacts, mask wearing is mandatory for staff and high school students returning to school as close contacts for 5 school days and strongly recommended for primary school students returning to school as close contacts for 5 school days. Students or staff identified as close contacts who are unable to wear a mask will be supported to learn or work remotely.
- **Rapid antigen tests (RATs).** The department will send another round of RATs to our school early this term, which we will provide to you in the form of 1 multipack of 5 RAT kits per student. These RATs can be used as required for symptomatic testing, such as if your child is displaying even mild symptoms, and daily testing for close contacts returning to school. Once these department-supplied RATs are exhausted, please continue to access store-purchased RATs which are now readily available in the community or PCR tests. Alternatively, let the school know that you need more and we will try and assist. Additionally, our school will be maintaining a reserve stock of RATs onsite to support symptomatic testing in the event of an outbreak in our school community. Please also remember that positive RAT results must be registered with [ServiceNSW](#), and students who test positive to COVID-19 must not attend school until their isolation period ends and they are symptom free.
- **Close contacts.** Students identified as close contacts remain able to attend school providing they are symptom free, notify the school and return a negative COVID-19 test result daily for 5 consecutive school days. Additionally, secondary students are required to wear a mask for 5 consecutive school days (except when eating/drinking or exercising). Please note that students identified as close contacts are still unable to attend overnight excursions, including camps. Visitors identified as close contacts who are engaging directly with students are required to return a negative COVID-19 test result before attending our school and wear a mask.
- **Close contacts for SSP's and Support Classes.** The rules regarding close contacts in SSPs, support units/classes and students using assisted transport programs remain unchanged. Students in these settings are not allowed to attend school as close contacts and will continue to be supported to learn remotely. Additionally, visitors identified as close contacts are not allowed to engage directly with students in these settings.

- **Responding to our local situation.** We will continue to liaise with NSW Health and the department's Health, Safety and Staff Wellbeing Case Management team to ensure our COVID-smart settings keep up with the latest developments. If local conditions require it, this may mean reintroducing temporary additional COVID-smart measures to act as a 'circuit breaker', including:
  - mandating mask wearing for all staff and students in Year 7 and above (high school settings)
  - mandating mask wearing for all staff (primary school settings)
  - postponing or limiting non-essential activities like excursions, indoor assemblies and visitors to the school
  - directing cohorts to learn remotely for short periods of time.
  
- **Maximising natural ventilation.** The department has reviewed environmental differences across NSW as part of their winter ventilation planning to ensure that local climatic conditions at each school are considered. The department will continue to provide local guidance to schools, including advice on maximising natural ventilation while balancing thermal comfort and the use of indoor and outdoor learning areas for school activities to support schools to adapt to local climate conditions throughout the winter months.
  
- **Reducing the risk of illness this winter.** Finally, it is important to note NSW Health's advice to reduce our risk of not only COVID-19, but other illnesses that may affect our school at this time of year such as the flu and [respiratory syncytial virus \(RSV\)](#), both of which can be serious in younger people. We can all protect our loved ones and our community by:
  - staying home and getting tested if unwell or displaying any symptoms
  - keeping up to date with our vaccinations – including the flu vaccine, which is available from your local GP, pharmacy, or Aboriginal Medical Service now
    - flu vaccines are free for all children aged 6 months to under 5 years, or for a small charge for those aged 5 years and older
  - getting tested immediately for COVID-19 if you become symptomatic and isolating until you receive a negative result and are symptom free
  - practicing good hand hygiene by washing regularly with soap and water
  - taking a RAT before visiting vulnerable loved ones or going to large gatherings and events.

On behalf of the staff, I would like to thank you again for your ongoing support and resilience as we continue to work together to support our students.

Kind regards,

Ms Deborah Santucci  
Principal
